

Visual Specimen Manager™ (VSM) by Aptia is a revolutionary solution to the complexities of tissue management. Developed by software experts and medical researchers, our user friendly web based software is the ideal solution to the unique challenges of tissue and specimen management.

PRODUCT DETAILS

With VSM, the entire organization experiences across the board benefits. Specimen retrieval, distribution and documentation processes are streamlined, productivity is increased, compliance with mandated privacy regulations is ensured, communication and collaboration by researchers is improved and labor costs are reduced. As a completely customizable database, VSM allows facilities total flexibility in creating a specimen management solution that fits their every need.

- Web based software accessible from any computer with an internet connection
- Personalized dashboard
- User-friendly search options
- State-of-the-art security features
- Precise inventory control & specimen tracking
- Numerous reporting options
- Barcode scanning capabilities
- Regulatory compliance safeguards
- Informed consent controls
- Customized color-coding
- Visual & graphical mapping
- Expandable & versatile data fields
- Disaster proof back-up assurance
- Chain of custody tracking
- User-defined drop down menus
- Customizable access & password protection measures
- Online ordering convenience
- Detailed storage ID capabilities
- “Shopping cart” type sample selection
- Mouse-over information enhancements
- Precise sample location identification
- Scalable for future growth
- Precise graphical & descriptive search results
- Quantity tracking
- Required data entry fields

KEY BENEFITS

- Access VSM from anywhere, anytime based on your organizations security policies
- Better organization—a simple graphical interface represents freezer space in a folder hierarchy that lets users see and edit all levels of the inventory management system.
- More easily comply with internal and external regulations
- Easy to use interface with full access control allowing for easy assignment of roles based on your own operating standards and requirements
- Patient consent records are included for compliance with HIPAA and other confidentiality requirements.
- No desktop clients requiring updating—fully web based access works with any browser
- Easily process samples through Internal Review Boards

MINIMUM SERVER REQUIREMENTS
